COMMITTEE REPORTS

Contests and Rules

Pylon: Neil Makar report: Covered park flyer racing results and proposed rules for open class racing: <50oz, <50 inch wing span, 4 cell LiPo or less and < 75 mph. Proposed the new class be called Reno racing.

Combat: Report: Much, much and even much more mayhem and a whole lot of carnage.

Special Event: Openshop / Auction @ Bluesky on Aug 19th, was a success, many items were purchased, and the proceeds (\$450) will go to the club, earmarked for the school program.

Special Event: Chuck plans to run a Golden Age Fly-in near the end of October; a firm date has not yet been set. He will CD the event's airshow maneuvers, including a wing walker drop. we will have food & prizes.

Safety

Club Safety Officer: P-47 went in after loss of aileron. Went up in flames due to flight battery catching fire. KC reminded club members to ensure hands are clear of the prop when arming electric aircraft.

President: Remember to voice your intentions **loudly** prior to executing them. Many of our members have difficulty hearing. It is the responsibility of the pilot performing the maneuver to ensure the rest of the field knows his intentions. During combat, ensure you wait until all planes are down, **BEFORE** you proceed onto the field. There are electric planes in combat now, and they don't make much noise. Don't let the lack of engine noise fool you into thinking all planes are down.

Field Maintenance

KITSAP

Aircraft Radio Control Society

The security camera's and signs have been installed. We haven't got enough evidence yet to go after somebody, but it will happen.

Terry has been doing a great job of keeping the grass short, and the field is dry, but looks great. 11th October will be a field maintenance day.

Instruction

Doug: Talked about "SAFE" system by Horizon Hobby.

Greg:

Robert: Russ is doing a great job and progressing quickly

KC: Available for a student.

Any others
